

SEE a live musical spatial experience oos together with the minimal groove composer, Nik Bärtsch and his

band MOBILE, conceived the live musical and spatial experience «SEE» for the traditional Zürcher Theater Spektakel.

A textile surface illuminated both from top and bottom in various colour tones, surrounds a central circle of black sand from whence the musicians performed. The light show was coordinated with the musical composition, and the changing mood as night time approached.

«SEE» spliced sound, time and space into a unique visual and auditory experience that derived its power from the interplay of the opposing elements of land and water, of rhythm and repose, of light and darkness, of beginning and end.

see - a live musical spatial experience
zürcher theater spektakel - lakeside stage

realisation: 09.2005
production, concept: nik bärtsch's mobile & oos
co-production: zürcher theater spektakel
